

## EMR Bulletin #6

### EMR System Upgrade

Thursday, 2 July 2020

The new version of the EMR is here! Please ensure you make yourself familiar with the important updates below.

### Medication IV set – order sentences- UPDATE

We have completed our change and IV set and infusion orders now default “hr(s)” in the “Infuse Over” field as shown below.

Details for Glucose 5% in Water intravenous solution BAG BY BAG 1,000 mL			
Details	Continuous Details	Order Comments	
Base Solution	Bag Volume	Rate	Infuse Over
Glucose 5% in Water intravenous solution BAG BY BAG 1000 mL	1000 mL	mL/hr	hr(s)
Additive	Additive Dose	Normalized Rate	
Total Bag Volume	1000 mL		
Weight:			

### VTE Care Pathway in EMR

The EMR VTE Care Pathway is currently unavailable in the system. Please refer to the [PROMPT VTE Risk Assessment Guideline](#) in the interim period and continue to use the EMR to order prophylaxis for your patients.

The EMR team are currently working on a fix that will enable improvements to the VTE Pathway, scheduled for completion Friday, 3 July.

### Custom Patient Lists

Please check that all custom patient lists are present and notify EMR Helpdesk immediately if there are any issues.

Detailed information is available in the [EMR System Upgrade Release Notes](#). If you have a ‘how-to’ question, please refer to the [updated QRGs on the EMR website](#) or ask a teammate or EMR Champion.

**Please note:** All managers are requested to share these updates with their teams and discuss at stand-ups and handover.
